MICRO-CLIMATE WIND TUNNEL - SUMMER|WINTER

SUMMER WIND DIRECTION: SOUTH

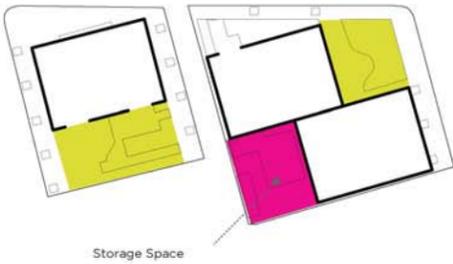

WINTER WIND DIRECTION: NORTHWEST

SITE CONCEPT

A. Condense or Relocate maintenance storage to free up more community space

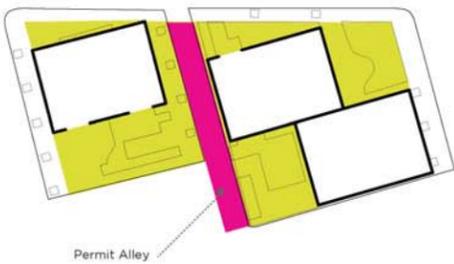

B. Regrade lower level spaces to create connected network of open space

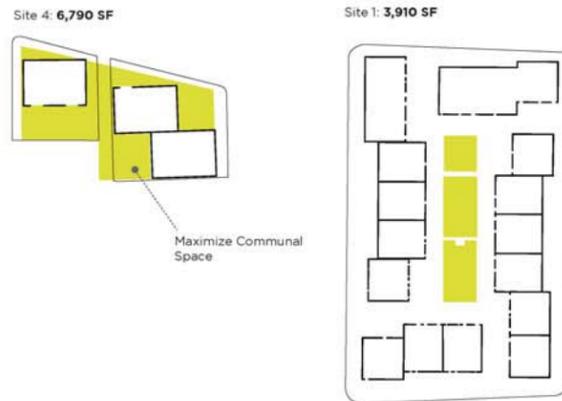

C. Design pedestrian connections to link space across the alley

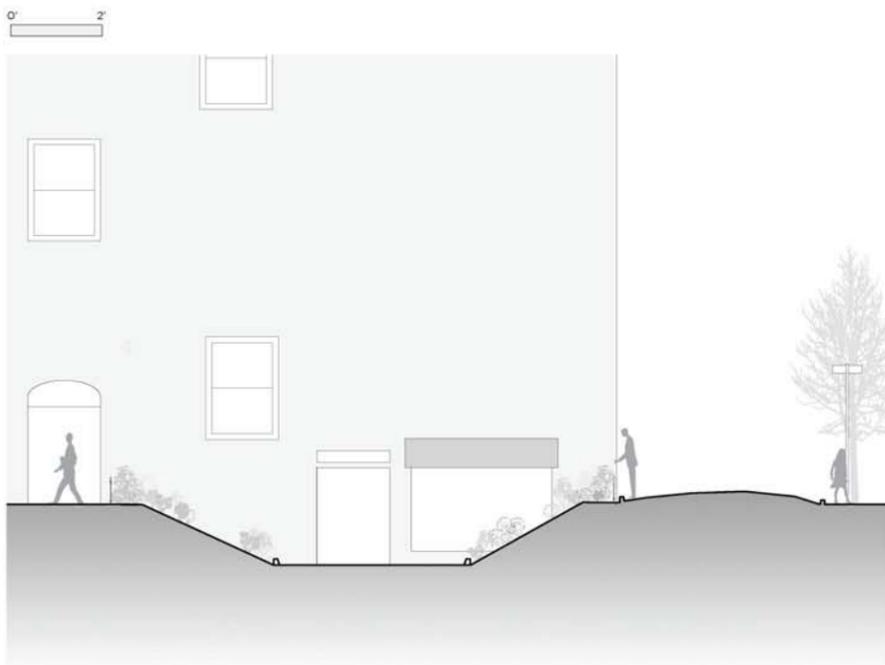

D. Close a portion of the alley, via city permit, to allow occasional large events

E. Resulting connected common space in Site 4 could be larger than Site 1
